

Purely extrinsic (look outward)

A Moran process

$\propto \text{fitness } f_j$

focal, w.p. $1/N$

copy role model's action (no acceptance step)

B Fermi imitation dynamics

copy a random player with prob

$$\varphi(\pi_i - \pi_j)$$

Intrinsic (look inward)

C Aspiration dynamics

switch toward aspiration A with prob

$$\varphi(\pi_i - A)$$

D Introspection dynamics

counterfactual

switch with prob

$$\varphi(\pi_i - \pi_{i'})$$

one action type

another action type

focal (w.p. $1/N$)

counterfactual
