

Purely extrinsic (look outward)

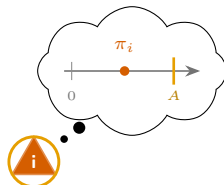

A Moran process

Select role model $\propto$ fitness $f_j(\mathbf{a})$

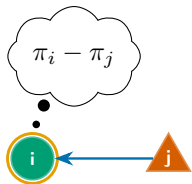

Intrinsic (look inward)

B Aspiration dynamics

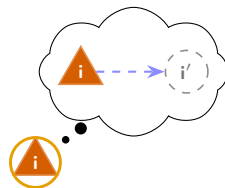

Switch with probability $\phi(\pi_i(\mathbf{a}) - A)$

C Fermi imitation dynamics

Copy random player with probability
 $\phi(\pi_i(\mathbf{a}) - \pi_j(\mathbf{a}))$

D Introspection dynamics

Switch with probability $\phi(\pi_i(\mathbf{a}) - \pi_i(\mathbf{b}))$
