

Purely extrinsic (look outward)

Intrinsic (look inward)

A

Moran process

$\propto \text{fitness } f_j$

copy role model's action (no acceptance step)

C

Aspiration dynamics

action picked at random

switch toward aspiration A with prob

$$\varphi(\pi_i - A)$$

B

Fermi imitation dynamics

j picked at random

copy a random player with prob

$$\varphi(\pi_i - \pi_j)$$

D

Introspection dynamics

action picked at random

counterfactual

switch with prob

$$\varphi(\pi_i - \pi_{i'})$$

cooperate

defect

focal (w.p. $1/N$)

counterfactual
